

North Central Cancer Treatment Group

94-72-52: Diagnostic and Prognostic Markers in High-Grade Glioma

Addendum 5 – April 21, 2006

Summary of Change

- The previous title of this study “Diagnostic and Prognostic Markers in Anaplastic Astrocytoma and Anaplastic Oligoastrocytoma” was misleading as this study explores diagnostic and prognostic markers for high-grade glioma patients. Therefore, the title has been revised.
- David W. Kimmel, M.D. has been removed from the title page as he is no longer with the Mayo Clinic.

Replacement pages are included. Please incorporate into the protocol and keep this addendum with your protocol.

Title page: The title of the study has been revised as follows to reflect that this study explores the diagnostic and prognostic markers for high-grade glioma patients:

Diagnostic and Prognostic Markers in ~~Anaplastic Astrocytoma and Anaplastic Oligoastrocytoma~~ High-Grade Glioma

David W. Kimmel, M.D. has been removed from the title page as he is no longer with the Mayo Clinic.

Also reflects Addendum 5 and revised NCI version date.
