Re: N0392, Assessment of Patient Satisfaction with Participation in NCCTG Clinical Trials

The above study is now active. An activation protocol and forms packet are enclosed.

All NCCTG sites must submit this protocol to their local IRB for approval. If N0392 is approved for inclusion in any NCCTG treatment trial, it is mandatory that the patient be asked to participate. The request for participation should be documented in the patient's medical record.

NOTE: The Eligibility Checklist for this study should be submitted at the same time as registration for the parent study takes place.

NOTE: NCI case credit will not be assigned for this protocol. N0392 has been developed as a stand-alone study only so that specific details of the protocol do not need to be added into every NCCTG treatment protocol. Costs to administer N0392 should be minimal.

If you have any questions, please feel free to contact me.
