Re: N04C2, An Exploratory, Randomized, Placebo-Controlled Trial of Depot Octreotide (Sandostatin LAR[®] Depot) for Symptomatic Ascites in Cancer Patients

Enclosed are revised on study and paracentesis data collection forms. "Paracentesis Information" has been removed from the on study form; "Baseline" has been added as an option next to "Cycle" on the Paracentesis Data Collection Form.

Please discard previous versions of these forms.

If you have any questions concerning this communication, please contact me at mann.patricia@mayo.edu.
