Research Protocol Specialist  
Re: N08C1 Fast Accrual Status

Please note: This protocol has been identified as potentially having very rapid accrual. As a result, it has been determined that a single site can not put on more than 10% of the total number of patients per month for the first 3 months that the protocol is opened. For this study, this means that a site cannot register:

Greater than 32 patients by March 27, 2009  
Greater than 64 patients by April 27, 2009  
Greater than 96 patients by May 27, 2009

Please monitor the number of patients you enroll during these first 3 months. If you need assistance, you can contact the Registration Office at 507-284-4130 or me at 507-538-6647.
